DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a method, classified in class 430, subclass 125.
- II. Claims 10 and 11, drawn to an image forming apparatus, classified in class 399, subclass 302.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by hand such as by exposing the surface of a charged photoreceptor to light through a screen having an image, sprinkling toner across the surface of the imaged photoreceptor by hand cascading of the toner, applying light pressure to the toner through an intermediate transfer sheet to transfer the toner to the surface of the sheet, moving the sheet by hand to a sticky final receiving member to apply the toner to the final member, and then brushing the surface of the photoreceptor with a fur brush to remove any residual toner.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Cameron Kerrigan on 24 March 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1756

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
